FOREWORD

This directory was compiled to provide a ready reference about Federal toxic chemical coordinating groups. It should also facilitate further communication between agencies and the groups themselves. Included are committees, task forces, and other groups that perform coordinating functions in conjunction with Federal toxics control and testing agencies. There are Federal, State, non-profit and private sector members on these groups. However, there was no attempt to include international coordinating groups.

Due to the constantly changing functions, memberships, and contact information for such groups, persons aware of errors, deletions, or changes in this compilation should contact the Program Integration Division; telephone: (202) 755-2778; address: Office of Pesticides and Toxic Substances (TS-793), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

Walter W. Kovalick, Jr.

I. COMMITTEES AND GROUPS

ADMINISTRATOR'S TOXIC SUBSTANCES ADVISORY COMMITTEE (ATSAC)

This Committee is authorized under the Toxic Substances Control Act (TSCA), 15 U.S.C. 2601, and is supported by the Office of Toxic Substances in the Environmental Protection Agency (EPA).

The Committee advises, consults with, and makes recommendations to the Administrator, EPA, on policy, technical, and procedural matters related to the environmental, economic, social, and legal impacts of actions considered under TSCA. The Committee also considers and comments on proposals for rules and regulations and assesses the likely impacts of such rules and regulations should they be promulgated.

CLEARINGHOUSE ON ENVIRONMENTAL CARCINOGENS (CEC)

The Clearinghouse, funded by the National Cancer Institute (NCI), serves as an advisory body to the Institute staff and other Federal agencies and

groups who are interested in carcinogenic-related issues and reviews the NCI Bioassay Program as well. The group is composed primarily of professionals from industry, academia, labor unions, and concerned citizen groups, but includes interested ad hoc Federal members as well. The group primarily focuses on chemical selection, study designs, and evaluation of study results.

COMMITTEE TO COORDINATE ENVIRONMENTAL AND RELATED PROGRAMS (CCERP) (DHEW)*

The DHEW Committee to Coordinate Environmental and Related Programs, hereinafter referred to as the Coordinating Committee, was established by the Assistant Secretary for Health, DHEW, as a multiagency group to provide a medium to ensure the exchange of information on environmental health, toxicology, and related programs, to coordinate these programs, to enhance sharing of resources, and to provide advice to the Department. The Coordinating Committee shall interface these activities with other components of the Federal Government in areas of mutual interest and concern.

GENE-TOX PROGRAM

The function of the Gene-Tox Program is to evaluate the current status of bioassays in genetic toxicology after a comprehensive examination is made of published data. The Program is sponsored by and responsible to the Office of Pesticides and Toxic Substances.

To that end, the Program convenes workgroups of scientists to evaluate tests they have developed or used extensively and provides general guidelines for the selection and evaluation of published data.

INTERAGENCY COLLABORATIVE GROUP ON ENVIRONMENTAL CARCINOGENESIS (ICGEC)

The purpose for forming the Interagency Collaborative Group on Environmental Carcinogenesis is to provide a forum for information exchange among the Federal agencies concerned with environmental health and environmental carcinogens; also, to provide the National Cancer Institute with a resource for program development using monitoring systems and resources of other agencies to delineate levels of environmental exposure to carcinogens in man's media such as air, water, diet, drugs, cosmetics, atmospheric agents (ultraviolets), and finally exposures in the workplace. The group offers advice to all Federal agencies involved in carcinogen-related matters and is responsible to the Director of the Division of Cancer Cause and Prevention in the National Cancer Institute.

INTERAGENCY REGULATORY LIAISON GROUP (IRLG)

The four agencies originally comprising the Interagency Regulatory Liaison Group, the Consumer Product Safety Commission, Environmental Protection Agency, Food and Drug Administration, and Occupational Safety and Health Administration, signed an interagency agreement in August 1977 to improve public health through information exchange and to reduce waste and duplication in government. The four agencies established a cooperative endeavor to protect the public from exposure to harmful levels of toxic substances by use of consumer products, foods, and drugs in the workplace, or through exposure to contaminants in land, air, or water, by the sharing of information and the development of consistent regulatory policy. In December 1978, a fifth agency, the Food Safety and Quality Service of the Department of Agriculture, joined in this cooperative effort.

INTERAGENCY TOXIC SUBSTANCES DATA COMMITTEE (ITSDC)

The Environmental Protection Agency (EPA) and the Council on Environmental Quality (CEQ) jointly have established and co-chaired an Interagency Toxic Substances Data Committee in accordance with their statutory responsibilities under the Toxic Substances Control Act (TSCA), Sections 10(b)(1) and 25(b). These sections of the Act specifically recognize the need for interagency coordination with respect to chemical information collection, dissemination, and classification. The Committee also facilitates the broad coordination and policy development responsibilities of CEQ under the National Policy Act of 1969 and the Environmental Quality Inprovement Act of 1970.

This Committee is studying and coordinating the planning and activities concerning chemical data and information projects of the major Federal producers and users of chemical data so as to minimize the total burden of reporting which is placed upon the private sector; it is also studying ways to facilitate the collection, analysis, and exchange of data among Federal agencies and other user groups.

The Committee interfaces directly with the Office of Program Integration and Information, Office of Toxic Substances, EPA, and makes recommendations with respect to TSCA data dissemination outside of the Agency.

Section 10(b)(1) Subcommittee of the Interagency Toxic Substances Data Committee (ITSDC)

This Subcommittee is responsible for coordinating Federal information-gathering activities in order to minimize duplicative reporting and recordkeeping requirements; providing early interagency review of proposed TSCA Section 8 regulations (reporting and retention of information); identifying the most efficient Federal authority to respond to informational needs; and recommending policies to promote interagency exchange of information.

Chemical Substances Information Network (CSIN) Subcommittee of the Interagency Toxic Substances Data Committee (ITSDC)*

This Subcommittee of the Interagency Toxic Substances Data Committee (ITSDC) reports directly to the co-chairpersons of the parent committee. The Subcommittee is charged with designing, implementing, and maintaining efficient and effective systems for the storage, retrieval, and analysis of data and information concerning the effects of chemical substances on biological systems and the environment that will be used by researchers, research administrators, government, academia, and also concerned citizen groups.

The following agencies are represented on this Subcommittee: Department of Health, Education, and Welfare; National Institutes of Health; National Library of Medicine; National Institute for Occupational Safety and Health; Occupational Safety and Health Administration; Environmental Protection Agency; National Institute for Environmental Health Sciences; Department of Commerce; Council on Environmental Quality; Department of Energy; National Academy of Sciences; Consumer Product Safety Commission; Food and Drug Administration; and Department of Agriculture.

*The full membership of this Subcommittee was not established at the time of publication. Inquiries should be directed to Dr. Henry H. Kissman or Dr. Sidney Siegel.

Public Liaison Subcommittee of the Interagency Toxic Substances Data Committee (ITSDC)

This Subcommittee serves as the vehicle for dissemination to the general public of information generated by the full Committee. To ensure that all interested parties are apprised of the full Committee's activities, members of the Subcommittee represent many public and private sector organizations.

For minutes and other relevant information regarding the subcommittee please contact: Ms. Cathy Brooks, U.S. Environmental Protection Agency, PM-218, 401 M Street SW., Washington, DC 20460.

NATIONAL RESPONSE TEAM (NRT)

The National Response Team (NRT) has been mandated by the Council on Environmental Quality in its National Contingency Plan. This team consists of representatives from both the primary and advisory agencies. It is the national body for planning and predparedness for emergencies involving toxic releases to the environment as well as active coordination during an ongoing emergency situation.

The NRT is activated as an emergency response team when requested by any primary agency representative or when a discharge: (1) exceeds the response capability of the region in which it occurs; (2) transects regional boundaries; or (3) involves significant numbers of people or nationally significant amounts of property.

NATIONAL TOXICOLOGY PROGRAM (NTP)
PUBLIC HEALTH SERVICE
DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

The National Toxicology Program, established by the Secretary of the Department of Health, Education, and Welfare (DHEW), is a departmentwide effort to provide needed information to regulatory and research agencies and to strengthen their scientific bases. The Program is designed to strengthen the

Department's activities in the testing of chemicals of public health concern as well as to develop and validate new and better integrated test methods. It is at present composed of the relevant program staffs of the Food and Drug Administration, National Cancer Institute, Center for Disease Control/National Institute for Occupational Safety and Health, and National Institute of Environmental Health Sciences. The Program is planned, programed, and coordinated by its Director, who is responsible for developing an Annual Plan of research and testing activities.

The Executive Committee is composed of the heads of the various Federal agencies interested in chemical toxicology. It consists of the aforementioned DHEW agencies plus the Consumer Product Safety Commission, Occupational Safety and Health Administration, and Environmental Protection Agency. The Committee advises the Program Director on the development and approval of the Annual Plan.

EPA Hazard Warning Workgroup*

This Workgroup is primarily responsible for coordinating Agency actions in the development of rules under Section 6 of the Toxic Substances Control Act (TSCA), which requires that warnings accompany hazardous chemical substances and mixtures distributed in commerces. The Workgroup plans to work jointly with the Occupational Safety and Health Administration in this effort.

Workgroup for Chlorofluorocarbons (CFCs)
Phase II Non-Aerosol Uses

This Workgroup, under the direction of the Office of Pesticides and Toxic Substances, consists of representatives from the Environmental Protection Agency (EPA), Food and Drug Administration, Consumer Product Safety Commission, Department of Commerce, and other agencies interested in chlorofluorocarbon (CFC) control. The Workgroup, in its second phase of CFC investigation, assists EPA in the evaluation of current data involving the effect of CFCs on the ozone layer to determine whether additional regulation is necessary and, if so, to what extent. The Workgroup has chosen the collective evaluation approach in order to maximize resources, avoid duplication and overlap of functions, and promote the coordination of research, regulatory, and enforcement actions involved in protecting the ozone from CFCs.

SCIENCE ADVISORY BOARD (SAB)
ENVIRONMENTAL PROTECTION AGENCY

The Science Advisory Board is composed of approximately 80 scientists representing various disciplines, who serve as consultants to the Environmental Protection Agency (EPA). The SAB receives its authority from the Environmental Development and Demonstration Act of 1977 and reports directly to the EPA Administrator.

SAB scientists are called upon to review and render opinions on those issues considered relevant by the Agency.

The following is a list of specialized committees and their executive secretaries, through whom all inquiries should be directed.

CHAIRMAN

SCIENCE ADVISORY PANEL (SAP)
FIFRA

The Science Advisory Panel was created by 1975 Amendments to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Its primary purpose is to provide expert comment on the human health and environmental effects of proposed regulations. In addition, the panel is charged with the review of the impact on health and the environment of all cancellation actions on pesticides which fall under Section 6B of the Act.

The panel is composed of seven members selected, appointed by, and responsible to the Administrator, Environmental Protection Agency. All panel members are scientists with sufficient professional qualifications to provide expert comment on the potential effects of proposed regulatory actions affecting the use of pesticides.

TOXIC SUBSTANCES PRIORITY COMMITTEE (TSPC)

The Toxic Substances Priority Committee was formed by and is directly responsible to the Assistant Administrator for Toxic Substances, Environmental Protection Agency.

It was created to perform the following functions within the Agency: to serve a pivotal role in the implementation of the Toxic Substances Control Act (TSCA); to establish and execute the relationship of TSCA's authorities with other EPA laws; and to integrate EPA's approaches and activities related to toxic substances.

TOXICS TESTING AND ASSESSMENT RESEARCH COMMITTEE (TARC)

The Committee was organized in April 1979 by the Assistant Administrator for Research and Development to serve as a planning group in support of testing and evaluation of research needs for fiscal years 1980-84. The Committee reports directly to the Assistant Administrator for Research and Developmen.

Additional responsibilities include the recommendation of appropriate research plans to the Office of Research and Development and the Office of Toxic Substances.

TSCA INTERAGENCY TESTING COMMITTEE (ITC)

The Interagency Testing Committee was established pursuant to Section 4 (testing of chemical substances and mixtures) of the Toxic Substances Control Act (TSCA), with the continuing responsibility to identify and recommend to the Administrator of the Environmental Protection Agency chemical substances and mixtures which should be tested to determine their hazards to human health and the environment. The Committee is involved in a multistep screening procedure to identify for detailed review a limited number of substances and categories of substances likely to have priority for testing to determine their effects on human health and the environment.

CHAIRMAN

Dr. James M. Sontag National Cancer Institute	Building 31 Room 10A06 9000 Rockville Pike Bethesda, MD 20014	301-496-5108

VICE CHAIRMAN

Ms. Vera Hudson National Institute of Occupational Safety and Health	Priorities and Research Analysis Branch Room 8A-20 DHEW Parklawn Building 5600 Fishers Lane Rockville, MD 20857	301-443-2100
Dr. Sidney Draggan National Science Foundation	Division of Policy Researech and Analysis Room 1240 1800 G St. NW. Washington, DC 20550	202-632-7810
